FOR IMMEDIATE RELEASE

House's Butchering Announces Voluntary Recall

VERSAILLES, Ohio (Jan. 16, 2012)—House's Butchering, LLC. is voluntarily recalling 444 pounds of sliced bacon and 55 pounds of summer sausage due to the product being misbranded and packaged without a food safety plan. The products were sold from January 1, 2012 through December 31, 2012. There have been no illnesses reported.

Products involved in this recall include "Pork Bacon Thick Sliced" in approximately 1lb packages and "Beef Summer Sausage" in approximately 1.5lb packages. The label will contain 'House's Custom Butchering' on the address line and the label will have the ODA mark of inspection and Est. 54 will be within the symbol outline of Ohio. These products may also contain a five digit code, if present the code will begin with '12' (range: 12001 through 12366) on the label and would have been purchased directly from House's Butchering meat market only.

Routine meat inspection services provided by the Ohio Department of Agriculture considers these products adulterated due to the fact they were produced without the benefit of inspection. Additionally, the product is considered misbranded due to House's not having a HACCP plan to re-package bulk bacon and summer sausage purchased from federally inspected establishments.

House's urges their customers who have purchased the suspect products not to eat them and return them to the company. Customers may bring those designated packages to House's Butchering, LLC. 6442 Beamsville Webster Rd. Versailles, Ohio 45380 or contact Dan Whittington at 937-670-2654.
